

Choosing the Right Contractor

**CERTIFIED
INSTALLER®**

You are investing in long-lasting interlocking concrete pavement. Like any construction project, the quality of the finished product is highly dependent on the quality of the contractor doing the work. Because of that, we recommend hiring an ICPI Certified Concrete Paver Installer.

Certified Installers:

- Have installed a minimum of 10,000 square feet of pavers
- Attended a 2-day intensive training course on industry best practices for installation
- Passed a written certification exam
- And meet continuing education requirements to stay on top of industry best practices of interlocking concrete pavers

Verify installer certification and find additional information on choosing the right contractor at www.icpi.org. In addition to certification, it is recommended that homeowners also check job references, visit previously-installed projects and verify insurance and applicable licenses.
